

ILIOS PIVOT ARM SYSTEM

The Ilios pivot arm awning is perfect for many window and door applications, particularly balconies and multi-story windows. Featuring a contemporary aesthetic, it provides protection from the sun and rain and it's integrated weight bar profile neatly packs away in a beautifully designed aluminium round box.

FEATURES

- Can achieve up to 4m widths.
- Fully enclosed round aluminium box with integrated weight bar.
- No visible screws to enhance the aesthetic and to better integrate with surrounding architecture.
- Tensioned arms with maximum projection of 1500mm.
- Tested to withstand winds up to 50km/h.
- Manual or motorised system.
- Wall and ceiling installations.
- Winner of the International red dot design award 2012.
- Patented design.

ILIOS PIVOT ARM SYSTEM

Ilios matches lean design with excellent mechanical performance. Its round box with a totally integrating weight bar profile gives this system a clean, non-obtrusive and contemporary line and protects the fabric when the awning is completely closed.

Round box with integrated weight bar

FIXING SPECIFICATIONS

This system can be wall or top fixed, with a minimal profile when completely closed.

The Ilios range also includes a wire-guided system that utilises the same componentry, aluminium box and terminal profile. This enables you to create a consistent look across different architectural applications.

MAX AWNING DIMENSIONS

Max width: 4m
Max projection: 1.5m
